

OHID for BWC

OHID, is a secure and convenient platform for accessing Ohio state agency services, including the Bureau of Workers' Compensation (BWC). This fact sheet provides an overview of the transition to OHID for customers currently using e-accounts on the BWC website.

What Customers Can Expect:

- **OHID Account Setup:** Customers without an OHID account, create one and setup 2-Step Verification for seamless access.
- **Transition to OHID:** When notified for transition, users log in with OHID account to merge their e-account(s) with OHID account.

OHID Transition Process:

Key Points to Remember:

2-Step Verification: Mandatory for BWC website access with OHID login.

Unique OHID: OHID login should remain unique and not be shared; additional users have their own individual OHID accounts and BWC account access can be granted by primary user(s).

Multiple e-accounts: Simplify the login experience by merging multiple e-accounts into a single OHID account.

Multiple Users: Primary users can add secondary users who have their own separate OHID accounts. Each user must independently transition from their e-account to their OHID account.
